

## GENERAL SERVICES ADMINISTRATION

Region 3  
Washington, D.C. 20407

28 SEP 1967

25X1A9a

IN REPLY REFER TO:

[REDACTED]  
Chief, Real Estate and  
Construction Division  
Central Intelligence Agency  
Washington, D.C. 20505

25X1A9a

[REDACTED]  
We anticipate that in about a year from now approximately 677,000 square feet of warehouse space at the Federal Depot, 2800 Eastern Boulevard, Middle River, Maryland, may become available for reassignment to the Federal agencies.

25X1A

When space becomes available, we propose to relocate your agency from 272,965 square feet of space in [REDACTED]

25X1A6a

25X1A

[REDACTED] to approximately 273,000 square feet of warehouse space at the Federal Depot in Middle River. In addition, we propose to relocate the Federal Supply Service, General Services Administration, from the Federal Depot at Middle River to space your activity will vacate at [REDACTED]

25X1A

There are a number of reasons for these relocations. In supporting customers, which are practically all located in the Metropolitan area of the District of Columbia, from its warehousing operation in Middle River, FSS is incurring additional transportation expense in excess of \$300,000 per year over the cost of delivering from a location similar to [REDACTED]. We understand that your activity is supporting customers throughout the world, and therefore, would not incur a significant increase in transportation costs if relocated to [REDACTED]. In addition, FSS responsiveness to emergency demands of executive agencies for supplies would be greatly enhanced if delivery were made from a location within the Metropolitan D.C. area.

25X1A6a

25X1A

The Federal Depot at Middle River has a railroad spur and a loading dock which would be available for use by the occupying agency. It is located 11 miles east of downtown Baltimore on the Pennsylvania Railroad and three miles from Route U.S. 40. The Depot has the added advantage of being convenient to the harbor area and port facilities of Baltimore.

OL 7 6370

The space which we expect to become available may be inspected by contacting the GSA Buildings Manager, Mr. R. R. Myers, Federal Building, 31 Hopkins Plaza, Baltimore, Maryland. Mr. Myers' telephone number is 301-962-4904.

Please indicate your concurrence to our proposal by signing the enclosed copy of this letter, and returning it to our office.

Sincerely yours,

Richard H. Gaskins  
Chief,  
Space Management Division
